

# PALMER SINK LEG SYSTEM

## Flush component model

The Palmer *Flush* component leg system affords a cleaner and more contemporary feel than our Traditional models. The flush foot, corner, and tee fittings all contribute to a simple, yet stylish design working well with virtually any choice of vanity top.

All fittings and tubing are 100% brass, with specific items such as the foot, wall flange, and leg top-cap CNC machined from solid brass rod to very exacting tolerances and exceptional surface finish. Nickel and Chrome plating is architectural-grade, consistent with the quality of premium decorative plumbing fixtures.

*Palmer legs....high quality bath furniture.*
